

Bottle cooler & freezer counter top

- › Compact top loader for bottles
- › For fitting in or on the bar counter top
- › For chilling or freezing
- › Ideal for serving out the contents quickly
- › Professional image

› Gamko bottle coolers & freezers inset & surface-mounted counter top

Gamko manufactures and supplies convenient coolers and freezers for inset or fitting on the bar counter top. These compact top loaders for bottles, also referred to as *counter top coolers/freezers*, are plug-ready and ideal for serving chilled wine, liqueur or vodka by glass, at a constant temperature. The cooler provides a good overview on the bottles from above. As a result you can conveniently and quickly see what you are looking for to ensure smooth service behind the bar. In addition, a bottle cooler built into the counter top is a real eyecatcher. And when you combine it with the correct glasses, you give the bar a professional image.

Gamko manufactures the bottle cooler & freezer counter top in four variants: for a maximum of ten or twelve 1-litre bottles as a freezer or cooler. The VK/10 model is suitable for inset- and surface-mounting and has a capacity of up to a maximum of ten 1-litre bottles. The VK/12 model has been specially designed for inset and has a capacity of up to a maximum of twelve 1-litre bottles. The interior of both types is made of high-grade stainless steel (AISI 304).

General characteristics Bottle cooler & freezer counter top

- Plug ready (no separate condensing unit required)
- For chilling or freezing
- Cooling capacity 156W *
- Power consumption 175W*
- Interior made of high-grade stainless steel
- Ideal for inset for a professional imago
- Thermostat Cooling +10° C / +0° C,
Freezing +0° C / -15° C
