- › Available in three sizes and two exteriors
- › Powerful machine unit
- › Large storage capacity
- › Can be offered with your company logo/branding as an option
- › Optionally with wheels and/or printing for a mobile counter

# › Gamko ST-Line coolers top loaders

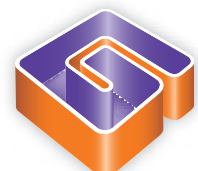

In addition to coolers with doors and drawers, Gamko also manufactures and supplies coolers with a handy sliding cover. These spacious top loaders, also referred to as *slide top coolers*, are plug ready and fit to addition to any bar layout. The slide top cooler provides a good overview onto the stock of bottles and canned drinks from above. As a result you can conveniently and quickly see what you are looking for to ensure smooth service behind the bar, while you maintain eye contact with the customer.

Gamko supplies the ST-Line coolers in three sizes: 130 litre, 210 litre and 375 litre capacities. The exterior is made of anthracite-coated steel panels or of chromium steel. The robust sliding cover is made of chromium steel (AISI 430) and is fitted with a lock as standard. The ST-Line coolers are supplied as standard with bottle divider(s), a bottle opener and a collection bin for bottle tops. Castors can also be ordered as an option. The top loader cooler also lends itself perfectly to being fitted with your advertising display. In this way, you can create a handy mobile counter out of the Gamko ST-Line cooler including publicity.
